We invite your interest in the position of **GENERAL MANAGER**

THE ORGANIZATION

The Weaverville Community Services District is a California Special District that provides drinking water production and distribution to the community of Weaverville and Douglas City in Northern California. The General Manager works under the direction of a board of five elected directors that set district policy and guide the current operations and future of the district.

THE CANDIDATE

The ideal candidate for the position would possess strong leadership skills, communicate well with others, and understand the value of community. Prior utility experience is preferred. A T3 & D2 certification is required or the ability to obtain them within one year of employment.

THE SYSTEM

The Water system consists of approximately 1700 connections, three surface water treatment plants, over 40 miles of distribution mains, six tank sites, and several pump stations. The system has a rich history dating back to the gold rush era yet has also embraced technological advances in the industry. With a modest staff of five, operations run efficiently and drinking water is achieved at the highest standard for the community at an affordable rate.
